Growing + Crafting

- Sustainable, healthy and responsible farming practices
- Cover crops, in-row mulching, leaf removal and general canopy management combined with a well implemented integrated pest management program and our dry and windy region, yields a growing environment naturally resilient to disease and pests
- Weather stations, soil moisture probes and a semi-automatic irrigation system allow us to micromanage water needs and as a result, water use
- Our vineyard sheep assist us in tending the vines by their grazing habits. Fruit zone leaf removal and ground cover are all part of their balanced diet; mobile composting
- All vines and fruit are hand tended, hand harvested, and hand sorted
- Various small lot harvests throughout October 2018
- Multiple small lot ferments using punch down extraction and aerated pump overs
- 16 months in 90% French oak 10% American oak barrels
- Unfinned + Unfiltered
